

Innovative Technology Management

Inteum Advantage Package

We have bundled a number of popular services available previously only “a la carte” and offer this package at a significant 40% savings.

Advantage Package includes:

- Unlimited access to all Inteum Company webinars for 12 months for all users at your site.
- 4 hours of Web Interactive Training (WIT) scheduled in 1 or 2 hour increments.

A trainer will work with you to create the WIT agenda specific to your business operations and needs.

During our implementation and support of Inteum C/S® at over 300 sites worldwide, we have developed detailed knowledge of what it takes to achieve the greatest value from the system. We want to share that experience with you and to increase the value of your investment.

We are very pleased to announce this *specially discounted* package of services we call the "Inteum Advantage" that delivers our knowledge to you, in specially tailored services, so you can put our experience and knowledge to work for you when you're ready.

The Inteum Team
