Revised Section 508 Report

Notes:

Chapter 3: [Functional Performance Criteria \(FPC\)](#)

Notes:

Criteria	Conformance Level	Remarks and Explanations
302.1 Without Vision	Partially Supports	Minuet does not produce audio output. Visually impaired and low-vision users depend on third-party screen-reading software (e.g., JAWS, NVDA, VoiceOver) to access the application, and results vary by tool. Basic built-in tools such as Windows Narrator/Read Aloud read all on-screen content but are not always precise about following focus to a specific row when the cursor moves; more full-featured screen readers are expected to perform better.
302.2 With Limited Vision	Partially Supports	Minuet supports browser/OS text resizing and meets WCAG color contrast requirements (see 1.4.3, 1.4.4 in Table 2), though some form layouts do not fully reflow at high zoom levels on narrower windows (see 1.4.10 Reflow, Table 2).
302.3 Without Perception of Color	Supports	Minuet does not use color alone to convey information (see WCAG 1.4.1, Table 1).
302.4 Without Hearing	Supports	Minuet does not include audio content and does not require audio output or

Criteria	Conformance Level	Remarks and Explanations
		input to operate; deaf and hard-of-hearing users are not impacted.
302.5 With Limited Hearing	Supports	Minuet does not include audio content and does not require audio output or input to operate; deaf and hard-of-hearing users are not impacted.
302.6 Without Speech	Supports	Minuet does not require voice/speech input from the user to operate.
302.7 With Limited Manipulation	Partially Supports	Minuet is fully operable by keyboard (see WCAG 2.1.1, Table 1). Users who cannot use a mouse or keyboard directly can operate Minuet using voice-control software available on their operating system; Minuet does not include a built-in voice-command feature of its own, so usability depends on the assistive technology available on the user's computer.
302.8 With Limited Reach and Strength	Partially Supports	Minuet is fully operable by keyboard (see WCAG 2.1.1, Table 1). Users who cannot use a mouse or keyboard directly can operate Minuet using voice-control software available on their operating system; Minuet does not include a built-in voice-command feature of its own, so usability depends on the assistive technology available on the user's computer.
302.9 With Limited Language, Cognitive, and Learning Abilities	Supports	Minuet provides clear labels, instructions, and error identification (see WCAG 3.3.1, 3.3.2, Table 1).

EN 301 549 Report

Notes:

Clause [4: Functional Performance Statements \(FPS\)](#)

Notes:

Criteria	Conformance Level	Remarks and Explanations
4.2.1 Usage without vision	Partially Supports	Minuet does not produce audio output. Visually impaired and low-vision users depend on third-party screen-reading software (e.g., JAWS, NVDA, VoiceOver) to access the application, and results vary by tool. Basic built-in tools such as Windows Narrator/Read Aloud read all on-screen content but are not always precise about following focus to a specific row when the cursor moves; more full-featured screen readers are expected to perform better.
4.2.2 Usage with limited vision	Partially Supports	Minuet supports browser/OS text resizing and meets WCAG color contrast requirements (see 1.4.3, 1.4.4 in Table 2), though some form layouts do not fully reflow at high zoom levels on narrower windows (see 1.4.10 Reflow, Table 2).
4.2.3 Usage without perception of color	Supports	Minuet does not use color alone to convey information (see WCAG 1.4.1, Table 1).
4.2.4 Usage without hearing	Supports	Minuet does not include audio content and does not require audio output or input to operate; deaf and hard-of-hearing users are not impacted.

4.2.5 Usage with limited hearing	Supports	Minuet does not include audio content and does not require audio output or input to operate; deaf and hard-of-hearing users are not impacted.
4.2.6 Usage with no or limited vocal capability	Supports	Minuet does not require voice/speech input from the user to operate.
4.2.7 Usage with limited manipulation or strength	Partially Supports	Minuet is fully operable by keyboard (see WCAG 2.1.1, Table 1). Users who cannot use a mouse or keyboard directly can operate Minuet using voice-control software available on their operating system; Minuet does not include a built-in voice-command feature of its own, so usability depends on the assistive technology available on the user's computer.
4.2.8 Usage with limited reach	Partially Supports	Minuet is fully operable by keyboard (see WCAG 2.1.1, Table 1). Users who cannot use a mouse or keyboard directly can operate Minuet using voice-control software available on their operating system; Minuet does not include a built-in voice-command feature of its own, so usability depends on the assistive technology available on the user's computer.
4.2.9 Minimize photosensitive seizure triggers	Supports	Minuet does not contain flashing content (see WCAG 2.3.1, Table 1).
4.2.10 Usage with limited cognition, language or learning	Supports	Minuet provides clear labels, instructions, and error identification (see WCAG 3.3.1, 3.3.2, Table 1).
4.2.11 Privacy	Supports	Minuet masks sensitive entry fields (e.g., passwords) using standard web form controls.
